Introduction

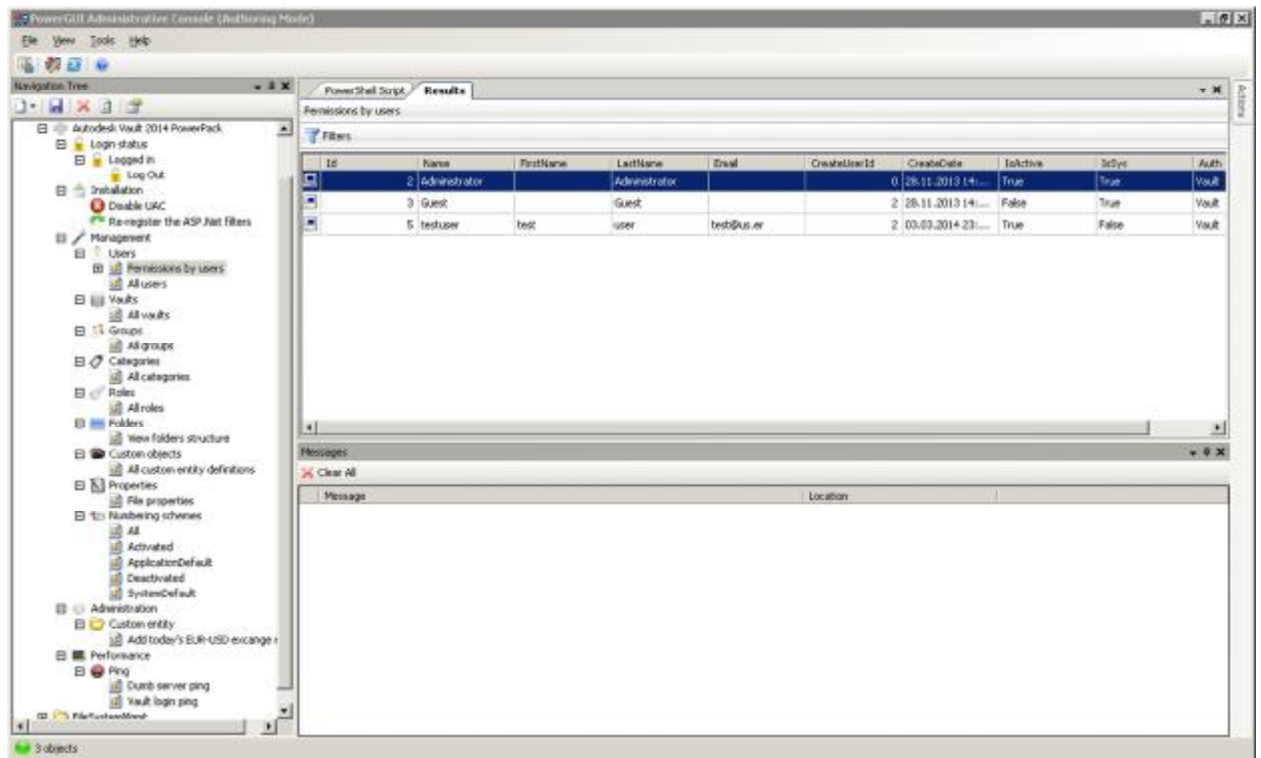

If you're Autodesk Vault administrator, your life probably will become more comfortable: the pack of PowerShell scripts is coming! With them you'll be able to work with Vault server just with installed SDK and PowerShell.

For more easy controlling and editing this pack you're invited to do this from [PowerGUI's Administrative Console](#).

Of course, not a lots and lots of tools, but fullness are directly corresponding with [Autodesk Vault Programmer's Cookbook](#) and your [feedback and suggestions](#).

Feel free to update this PowerPack for your needs – just change code in scripting nodes.

Screenshots

System requirements

1. Installed Autodesk Vault SDK 2014 in default location (**c:\Program Files (x86)\Autodesk\Autodesk Vault 2014 SDK\bin**).
2. PowerGUI v3 or higher.

Description

Installation from package

1. Install Autodesk Vault SDK 2014
2. Install **PowerGUI**
3. Launch **PowerGUI Administrative Console**
4. Go to **File->PowerPack Management**
5. Click **"Import"** button.
6. Find powerpack package in "**c:\ProgramData\Autodesk\ApplicationPlugins\Dmitry Yemelyanov Autodesk Vault 2014 Powerpack for PowerGUI.bundle\Contents\V2014\Autodesk Vault 2014 Powerpack for PowerGUI.powerpack**" location, and push **"Open"** button.
7. Push **"Close"** button.

Tools structure

Availability of tools executing for different Vault server editions (1): **B** – Vault Basic; **W** – Vault Workgroup; **P** – Vault Professional.

Node	Description	B	W	P
• Login status				
• Installation				
○ <i>Disable UAC</i>	Disables UAC. Reboot required	+	+	+
○ <i>Re-register the ASP.Net filters</i>	Re-registers the ASP.Net filters v4.0.30319 for x86 and x64 (2)	+	+	+
• Management				
○ <i>Users</i>	User management	+	+	+
▪ All users	Shows all users and information about them	+	+	+
▪ Permissions by users	Shows all users and permissions for every user by click	+	+	+
• <u>Add user...</u>	Add user to vault			
○ <i>Vaults</i>				
▪ All vaults	Shows all knowledge bases and information about them	+	+	+
○ <i>Groups</i>				
▪ All groups	Shows all groups and information about them	+	+	+
• <u>Add group...</u>	Add group to vault			
○ <i>Categories</i>				
▪ All categories	Shows all categories and information about them	+	+	+
• <u>Add category...</u>	Add category to vault			
○ <i>Roles</i>				
▪ All roles	Shows all roles and information about them	+	+	+
○ <i>Folders</i>				
▪ View folders structure	Shows folder structure in vault and information about them	+	+	+
○ <i>Custom objects</i>				
▪ All custom entity definitions	Show all custom entity definitions			
○ <i>Properties</i>				
▪ File properties	Shows all properties of 'FILE'	+	+	+
○ <i>Numbering schemes</i>				
▪ All	Shows all numbering schemes	+	+	+
▪ Activated	Shows all activated numbering schemes	+	+	+
▪ ApplicationDefault	Shows all application default numbering schemes	+	+	+
▪ Deactivated	Shows all deactivated numbering schemes	+	+	+
▪ SystemDefault	Shows all system default numbering schemes	+	+	+
• Administration				
○ <i>Custom entity</i>	Ticks for custom entities	+	+	+

Node	Description	B	W	P
<ul style="list-style-type: none"> ▪ Add today's EUR-USD exchange rate 	You should have "Exchange rates" custom object definition in your vault and assigned to "Custom objects" category "Value" property.	+	+	+
• Performance				
<ul style="list-style-type: none"> ○ <i>Ping</i> 	Pinging of Vault Server hardware and software	+	+	+
<ul style="list-style-type: none"> ▪ Dumb server ping 	Ping of Vault server, port 80	+	+	+
<ul style="list-style-type: none"> ▪ Vault login ping 	Simple benchmark of your Vault	+	+	+
• Help				
<ul style="list-style-type: none"> ○ Download and open readme 	Downloads help-file in PDF format from Internet in %temp% folder and opens it	+	+	+
<ul style="list-style-type: none"> ○ Export all scripts 	Exports all scripts from powerpack into files in required location	+	+	+

Usage

1. Click any node or folder in Autodesk Vault PowerPack.
2. Login dialog will appear.
3. Fill the form and establish connection to Vault Server. After first login, the login dialog will not appear while connection is alive.
4. The results will appear under node, you've clicked and in grid on Results pane.
5. If Results pane is not showing, enable it in **View** menu.
6. You can click any child node and see details about in.

Customization

Launch **PowerGUI Administrative Console (Authoring Mode)** from Start menu [to edit PowerPack](#).

Version history

v2.0.0.4 (3/14/2014)

What's new

Type	Change	Operation
Folder	Help folder	Added
Node	Download and open readme	Added
Node	Export all scripts	Added

v2.0.0.2 (3/10/2014)

What's new

Type	Change	Operation
Node	View folders structure	Debug, rewrite

Structure

Same as Structure in v2.0.0.1.

v2.0.0.1 (3/10/2014)

What's new

A lot of, better read "Structure" section.

Structure

Node	Description	B	W	P
• Login status				
• Installation				
○ <i>Disable UAC</i>	Disables UAC. Reboot required	+	+	+
○ <i>Re-register the ASP.Net filters</i>	Re-registers the ASP.Net filters v4.0.30319 for x86 and x64 (2)	+	+	+
• Management				
○ <i>Users</i>	User management	+	+	+
▪ All users	Shows all users and information about them	+	+	+
▪ Users permissions	Shows all users and permissions for every user by click	+	+	+
• <u>Add user...</u>	Add user to vault			
○ <i>Vaults</i>				
▪ All vaults	Shows all knowledge bases and information about them	+	+	+
○ <i>Groups</i>				
▪ All groups	Shows all groups and information about them	+	+	+
• <u>Add group...</u>	Add group to vault			
○ <i>Categories</i>				
▪ All categories	Shows all categories and information about them	+	+	+
• <u>Add category...</u>	Add category to vault			
○ <i>Roles</i>				
▪ All roles	Shows all roles and information about them	+	+	+
○ <i>Folders</i>				
▪ View folders structure	Shows folder structure in vault and information about them	+	+	+
○ <i>Custom objects</i>				
▪ All custom entity definitions	Show all custom entity definitions			
○ <i>Properties</i>				
▪ File properties	Shows all properties of 'FILE'	+	+	+
○ <i>Numbering schemes</i>				
▪ All	Shows all numbering schemes	+	+	+
▪ Activated	Shows all activated numbering schemes	+	+	+
▪ ApplicationDefault	Shows all application default numbering schemes	+	+	+
▪ Deactivated	Shows all deactivated numbering schemes	+	+	+
▪ SystemDefault	Shows all system default numbering schemes	+	+	+

• Administration				
○ Custom entity	Ticks for custom entities	+	+	+
▪ Add today’s EUR-USD exchange rate	You should have “Exchange rates” custom object definition in your vault and assigned to “Custom objects” category “Value” property.	+	+	+
• Performance				
○ Ping	Pinging of Vault Server hardware and software	+	+	+
▪ Dumb server ping	Ping of Vault server, port 80	+	+	+
▪ Vault login ping	Simple benchmark of your Vault	+	+	+

v1.2.0.3 (3/4/2014)

What's new

Type	Change	Operation
Node	View folders structure	Debug

v1.2.0.2 (3/3/2014)

What's new

Type	Change	Operation
Node	Re-register the ASP.Net filters	Added
Node	View folders structure	Added

Structure

Node	Description	B	W	P
• Installation				
○ Disable UAC	Disables UAC. Reboot required	+	+	+
○ Re-register the ASP.Net filters	Re-registers the ASP.Net filters v4.0.30319 for x86 and x64	+	+	+
• Administration				
○ Users	User management	+	+	+
▪ All users	Shows all users and information about them	+	+	+
▪ Users permissions	Shows all users and permissions for every user by click	+	+	+
○ Vaults				
▪ All vaults	Shows all knowledge bases and information about them	+	+	+
○ Groups				
▪ All groups	Shows all groups and information about them	+	+	+
○ Categories				
▪ All categories	Shows all categories and information about them	+	+	+
○ Roles				
▪ All roles	Shows all roles and information about them	+	+	+
○ Folders				
▪ View folders structure	Shows folder structure in vault and information about them	+	+	+

v1.2.0.1 (2/28/2014)

What's new

Type	Change	Operation
Node	Icons for folders	Added
Node	Login management	Totally changed

Structure

Node	Description
• Installation	
○ <i>Disable UAC</i>	Disables UAC. Reboot required
• Administration	
○ <i>Users</i>	User management
▪ All users	Shows all users and information about them
▪ Users permissions	Shows all users and permissions for every user by click
○ <i>Vaults</i>	
▪ All vaults	Shows all knowledge bases and information about them
○ <i>Groups</i>	
▪ All groups	Shows all groups and information about them
○ <i>Categories</i>	
▪ All categories	Shows all categories and information about them
○ <i>Roles</i>	
▪ All roles	Shows all roles and information about them

v1.1.0.1 (2/27/2014)

Development started.
